Nombre del Proyecto: PrimeCheck Enterprise

Nombre: Jonathan

La ejecución del lenguaje C

Captura de pantalla de cada opción:

1.

```
PS C:\Users\Jonathan\Documents\Proyectos De GitHub\PrimeCheck Enterprise> .\PrimeCheck.exe
========================================
       PrimeCheck Enterprise
               Version 1.0.0
========================================
1. Analyze a number
2. Batch analysis
3. Display divisors
0. Exit
========================================
Select an option: 1
Enter an integer: 12

========================================
           ANALYSIS REPORT
========================================
Input number: 12
Classification: COMPOSITE
========================================
```

1.

```
PS C:\Users\Jonathan\Documents\Proyectos De GitHub\PrimeCheck Enterprise> .\PrimeCheck.exe
========================================
       PrimeCheck Enterprise
               Version 1.0.0
========================================
1. Analyze a number
2. Batch analysis
3. Display divisors
0. Exit
========================================
Select an option: 2
How many numbers do you want to analyze? 3
Number 1: 12
Number 2: 34
Number 3: 56

========================================
              BATCH REPORT
========================================
Requested entries : 3
Prime numbers     : 0
Composite numbers : 3
Other/invalid     : 0
========================================
```

2.

```
========================================
       PrimeCheck Enterprise
                Version 1.0.0
========================================
1. Analyze a number
2. Batch analysis
3. Display divisors
0. Exit
========================================
Select an option: 3
Enter an integer between 1 and 1000000: 2

Divisors of 2:
1 2
Total divisors: 2
Conclusion: The number is prime.
```

3.

```
========================================
       PrimeCheck Enterprise
                Version 1.0.0
========================================
1. Analyze a number
2. Batch analysis
3. Display divisors
0. Exit
========================================
Select an option: 0

Closing PrimeCheck Enterprise...
Thank you for using the application.
